

1. *Latin & Bossa Tunes* - There are a lot of Latin jazz tunes out there. The more you play the better you will get at this style. Don't psych yourself out either! You're really not changing what you play, just the style and groove you play it in. You can keep all your voicings, lines and textures the same. You will just need to change your rhythms to a straight feel.

*Manteca* is a classic Latin jazz tune to learn. It is a very easy melody with some easy progression as well.
